

AIR RENTAL INC.

Clean Energy Electric Generator

Our clean electric generator offers a maximum power output of 120V/240V 7200 Watt and can power almost anything. Whether it is 120 Volts or 240 Volts, Powerhouse can single-handedly address all your power requirements wherever you may be.

The Powerhouse Power Panel 410W and Powerhouse Wind Turbine are the perfect combination for your off-grid needs! Since solar panels only work to gather energy during daylight hours, adding a wind turbine allows you to harness free energy even at night!

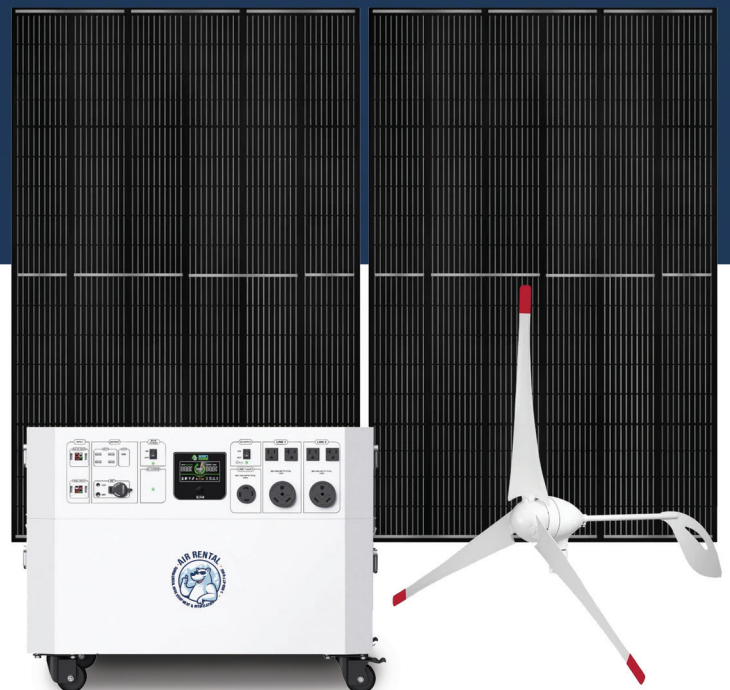

19,200 WH CAPACITY
13,300 WATT CHARGING INPUT

NO DIESEL
NO FUMES
GREEN ENERGY
SOLAR OPTION

SILENT OPERATION
OVERNIGHT POWER
CHARGE OTHER EQUIPMENT
2.5 HOUR RECHARGE

Contact Air Rental today! We offer safe, fast, reliable and professional installation services on even the most complex projects.

AC OUTPUT

2 x 3600W 120 Volt
1 x 7200W 240 Volt

DC OUTPUT

4 x USB Type A
1 x 12 Volt Output
1 x USB Type C
1 x 48 Volt Output
1 x 12V DC Port

CAPACITY

4800 Wh
Expandable With
Power Pod

CHARGING INPUT

2000W Solar Input -
Expandable
1000W Wind Input -
Expandable
1300W AC Wall Outlet
Input

WIND TURBINE

The Wind Turbine will allow you to harness the power of wind and provide you with an additional method of charging your Generator.

THE PERFECT COMBINATION

Since solar panels only work to gather energy during daylight hours, adding a wind turbine allows you to harness free energy even at night!

RED SAFETY TIPS

Red safety tips were added in all 3 Wind Turbine blades to make the blades visible while spinning.

DURABILITY AGAINST EXTREME WEATHER AND ENVIRONMENTAL CONDITIONS

The high-quality cast aluminum alloy body provides protection from natural elements and its sturdy design provides versatile use on land, water or wherever you decide to install the Nature's Generator Powerhouse Wind Turbine.

SOLAR PANEL

The Power Panel uses MONO PERC solar cell. A new solar cell technology that improves efficiency to harness more free energy from the sun.

DESIGN

The Power Panel is a 410W all-black frame and an all-black multi-busbar solar cell that adopts new technology to improve the efficiency of modules and offers a better aesthetic appearance making it perfect for rooftop installation.

HIGH EFFICIENCY LOW-LIGHT PERFORMANCE

The Power Panel 410W has higher module conversion efficiency (up to 20.38%) benefit from half cell structure and with the advanced glass and cell surface textured design ensures excellent performance in a low-light environment.

CHARGING INPUT

2000W Solar Input - Expandable
1000W Wind Input - Expandable
1300W AC Wall Outlet Input
